

“LET US CHANGE YOUR UNIVERSE. WORK FOR TEKSAVVY.”

“.NET DEVELOPER

WHAT YOU CAN EXPECT FROM US

- The opportunity to work on a wide range of projects
- Developing rich, interactive web experiences that allow our customers to access their information from their device of choice (desktop/mobile)
- Enterprise back-end office automation and partner B2N integrations to support our world class customer service team
- OLTP/OLAP Design, Business Intelligence Reporting and Data analytics modelling
- Network analytics and traffic analysis across an ever-expanding infrastructure
- Building integrations with a variety of cloud portals and platforms that extend our service delivery.
- Research projects focussed on exploring new platforms and frameworks that can be built into our product suite.

YOUR ROLE

- Working with an agile team to develop, test and maintain web & desktop-based business applications built on Microsoft technologies
- Assisting in the collection and documentation of user's requirements, development of user stories, and estimates
- Designing, developing and unit testing applications in accordance with established standards
- Participating in peer reviews of solution designs and related code
- Packaging and supporting deployment of releases
- Working with teammates in the migration of folder applications (asp) to current Microsoft technologies
- Developing, refining and tuning integrations between applications
- Analyzing and resolving technical and application problems
- Adhering to high quality development principles while delivering solutions on-time and on-budget
- Providing third-level support to business users
- Understanding object oriented programming concepts

Permanent, Full-Time

CHATHAM, ON / GATINEAU, QC

WHAT WE EXPECT OF YOU

As a Junior .NET Developer you are part of an agile development team building and working on enterprise grade software systems on top of the Microsoft .NET development stack. You are involved in all areas of development from design to development to testing.

We leverage a wide range of the Microsoft development stack, working with technologies and platforms:

- .NET
- ASP.NET MVC/WCF
- Microsoft SQL Server, SSRS, SSAS, SSIS
- SharePoint
- Dynamics CRM
- Lync 2013

YOU'RE GOOD AT

- Understanding object oriented programming concepts
- Understanding relational database design and querying concepts
- Familiar with version control concepts

MUST HAVES

- College or University degree in Computer Science or a comparable experience
- Strong desire to learn

NICE TO HAVES

- Exposure to:
 - Microsoft .NET development using C#
 - Web development using HTML5, CSS and JavaScript
- Knowledge of:
 - Client/server application development
 - Agile development methodologies
 - Unit testing theory

All qualified candidates can apply, however, priority will be given to Canadian citizens, permanent residents and candidates with a valid work permit for the duration of the position.
