

“LET US CHANGE YOUR UNIVERSE. WORK FOR TEKSAVVY.”

“NETWORK TECHNICIAN

LOCATION
TORONTO, ON

WHAT WE EXPECT OF YOU

The Network Technician is responsible for supporting our national network, server, and voice architecture. The successful candidate will install, configure and support internal and/or external networks, and troubleshoot network performance issues while being under general supervision.

This position reports to the Director, Network Operations.

WHAT YOU CAN EXPECT FROM US

The opportunity to work on a wide range of new projects within a growing team. A competitive salary based on qualification. The candidate will be eligible for group insurance after three months

YOUR ROLE

- Rack, build, cable, configure, and provision servers and deploy networking equipment including routers, switches and firewalls
- Tracing/verification of all cables, labelling and documentation
- Troubleshoot, test, quality assurance of server hardware
- General site maintenance, inventory of all optics and spare components, inventory of storage facility and review of required space
- Installation of cat5/6 cabling and fiber optic between equipment and patch panels, AC and DC power as required
- Install, maintain, upgrade and configure firewalls, network devices, and security devices.
- Work with colocation vendors on new and existing installations
- Support and implement the expansion of our IP network
- Monitor network usage using trend analysis and other tools
- Monitor server performance and identify problems
- Ordering, documentation, labelling xconnect orders to vendors/suppliers/partners
- Write clear technical documentation and test plans
- Provide internal support to Network Operations team and on-call rotation

ROLE TYPE

Full time

EXPECTED START DATE

As soon as possible

MUST HAVES

- Minimum (2) years of experience working in a data center, telco central office, or cable headend environment
- Minimum (2) years of experience with Cisco or Juniper network equipment
- Experience working with Ethernet cabling including copper and fiber and cabling termination (crimping, punchdowns)
- Sound understanding of routing protocols (OSPF/BGP) and OSI reference model
- Working knowledge of Linux operating systems
- Excellent organizational and communication skills. Eager to listen, learn and contribute
- Ability to work with minimal supervision and manage multiples projects and priorities and maintain high degree of self-motivation and independent decision-making
- Attention to detail
- Ability to lift/move 25-50 lbs equipment
- Valid driver's license

NICE TO HAVES

- Cisco and/or Juniper certification
- Experience working with IP technologies such as SIP, hosted PBX and Metaswitch
